Viva voce	:	10
Total	:	50

Answer *any one* question.

1. Develop a Flutter app using Dart programming where users can input their birth year, and on clicking a button, their age is displayed. 35
2. Develop a Flutter app using Dart programming where users can input a number and on pressing a button, the factorial of that number is calculated and displayed. 35
3. Develop a Flutter app using Dart programming that contains three buttons labelled 'Red', 'Green', and 'Blue' and when a button is pressed the background colour of the screen changes to the respective colour. 35

4. Develop a Flutter app using Dart programming that functions as a stopwatch with start and stop function. The app should include a display area to show start and stop button and an area where the time duration between start and stop will be displayed. 35

 5. Develop a Flutter app where the user inputs a year and checks whether it was a leap year or not. If it is a Leap year, display 'The year XXXX was a leap year'. Otherwise, display 'The year XXXX was not a leap year.' 35

 6. Develop a Flutter app using Dart programming where a button is displayed and each time the button is pressed, the button text changes randomly to one of five different messages. 35

 7. Develop a Flutter app using Dart programming where clicking on an item in a List View, navigates the user to a new screen displaying the selected item's name. 35

 8. Develop a Flutter app using Dart programming that converts Indian currency (INR) to US currency (USD) based on user defined exchange rates (86 INR=1USD). The app should include input fields for users to enter the amount, drop-down menus to select the input and output currencies and a button to perform the conversion. Ensure that the app displays the converted amount. 35
